

# ActiveHalo+® Safety Wearable

A rugged one-touch SOS wearable with fall detection, designed to meet your unique safety needs

## Built for today, ready for tomorrow

### Fall detection with user cancel

Get rapid help to your workers in any slip, trip, or fall event

### Immediate SOS and audible alarm

Connect to expert help at the press of a button, or sound an alarm to draw attention

### Standalone capabilities

No need to pair to a smartphone; just carry the ActiveHalo+® and stay connected to the SafetyAware platform

### Real-time response with trained agents

Two-way voice communication with live agents enables real time decisions

The **ActiveHalo+® Safety Wearable** is a robust tool designed to enhance worker safety. It features fall detection, an audible alarm, a one-touch SOS button, and two-way communication for real-time safety and location monitoring. Connected to Aware360's SafetyAware platform and supported by a 24/7 response center, the ActiveHalo+® ensures comprehensive protection for mobile workforces. With USB-C charging and critical privacy considerations, it's an essential device for organizations to effectively monitor and safeguard their at-risk or lone workers.
