LifeSaver Mobile

A smartphone app to take a preventative approach to employee road safety

Distracted driving is the #1 cause of vehicle collisions. And, according to the CDC, each accident resulting in a non-fatal injury can amount to $100,000. With LifeSaver Mobile, you can reduce at-fault collisions by 25-50%, increasing your employees' safety and reducing insurance premiums.

Improve driver safety with an easy-to-deploy app that automatically blocks the user's phone screen when driving, reducing distracted driving to prevent at-fault collisions before they occur.
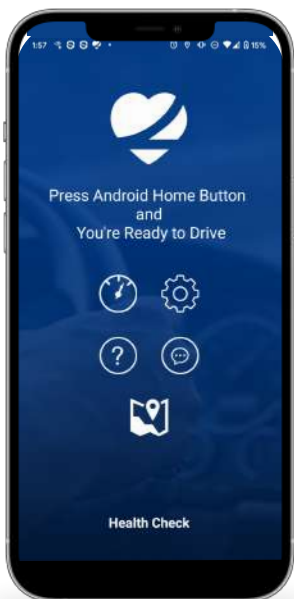

Mobile-based app for iOS and Android

Runs quietly in the background of your drivers' phone to automatically detect driving and block the screen, and generate real-time speeding alerts

LifeSaver Mobile fleet portal

Receive valuable and actionable insights into driver performance, all in one place.

Why choose Aware360's LifeSaver Mobile?

✔ Simple, app-based tool, available for iOS and Android

✔ No additional hardware required

✔ Easy on your employees' smartphone batteries

✔ Hands-free maps and calls

✔ Emergency unlock button

✔ Configurable speeding alerts

✔ Closed-loop driver feedback

✔ Detailed fleet portal for managers

✔ Daily and weekly exception reporting emails

✔ Call reporting and blocking

App download

Identify employees who drive for work purposes and download the app on their smartphones or implement through mobile device management.

Automatic blocking

Rest assured knowing your workers phones will automatically detect driving and block the screen, with customizable options if needed.

Insights and feedback

Gather insights from the LifeSaver portal to manage your fleet and tailor feedback to specific workers.

LifeSaver Mobile changes the culture of distracted driving and reduces costs by preventing incidents before they occur. This hassle-free and easy-to-deploy app allows drivers to keep their eyes on the road and managers to do their jobs without having to worry about disruptions to their productivity or fleet downtime.
